INVESTIGATION OF THE ELECTRICAL FUSION OF THIN WIRES. June 60, 31p. 7 refs. Picatinny Arsenal Trans. no. 100; AD-240 588.

Order from LC or SLA mi$3.00, ph$6.30 60-23115

Trans. of Zhurnal Eksperimental'noy i Teoreticheskoy Fiziki (USSR) 1947, v. 17, p. 986-997.

Results are presented of an investigation of a condenser discharge through thin wires, obtained with the aid of an image scanning controlled optical shutter and instantaneous shadow photography. At the discharge of a condenser through a copper wire, a fusion-like dispersion of the material in individual fragments takes place. This is followed by a current break, conditioned by the occurrence of a great number of fusions; after the latter have been filled up with metal vapors - phase of the gas discharge. (Author)
